Project no.: T012737

Reg. no. 10650798

To whom it may concern

On behalf of Elsam A/S and Energi E2 A/S we have tested the PROMECON MECONTROL Coal (G3) measuring equipment in an installation at Nordjyllandsværket Unit 3. A T-fired unit with 4 coal mills each supplying one level with 4 burners. Our tests were conducted in the 2nd half of 2003.

The equipment provides credible online measurement on Coal Dust flow, and we see it as a useful tool for examining both distribution and dynamic issues for the Coal Mill output.

Yours sincerely
Elsam Engineering A/S

Rasmus Madsen
